

Calor recommend the following single stage regulator be used with all propane cylinders:

Incorporating a Consumer Safety Over Pressure Device with Reset (OPSO)

CSR 485

Low Pressure 37mb Propane Cylinder Regulator 4kg/h (55kW)

Low pressure cylinder regulator fitted with the latest Consumer Safety Protection (OPSO)

- **New LPG safety system including Consumer Safety Reset (CSR) and Over Pressure Shut Off (OPSO*)** developed by Clesse enables the consumer to reset the regulator should the gas pressure exceed recommended limits, protecting appliances and property.
- Clear visible indication and resetting is performed by a “Push to reset” system, similar to electrical consumer RCD protection.
- Ideal for all types of LPG Propane cylinder applications Domestic, Commercial, Holiday and Park Homes.

Model No.	CSR 485
Capacity	4kg/h- 55kW - (187,500Btu/hr)
