

New-build heating & energy checklist

-  What heating system are you recommending, and why?
-  Is the property connected to the natural gas grid?
-  If not, what off-grid heating options are available?
-  Who will install and certify the heating system?
-  If using LPG, is all gas work being carried out by a registered gas installer?
-  Where will any LPG tank or cylinder storage be located?

New-build heating & energy checklist

-  What BER rating are we targeting?
-  How will insulation, airtightness and ventilation be managed?
-  Is the heating system compatible with BioLPG?
-  Can the system work alongside solar panels or other technologies?
-  Are smart heating controls included?
-  What are the expected running costs of the system?
