

CHOOSING YOUR TANK

With Calor, you can choose between an overground tank or a semi-mounded underground tank.

Our Home Energy Team will be happy to discuss the options with you. Here's some useful information which will help you choose the right type and suitable site for your tank.

It's important to note that your tank should be:

- 3m from any source of ignition (i.e. parked cars, unprotected electrical equipment)
- 1.5m from overhead cables
- Tank area to be kept clear of rubbish or combustible materials
- No hedging/bushes/shrubs within 1m of the tank
- Hedging on one side **only**, 1m from tank screening

Overground Tank - Distance measured from Shell of Tank

- 3m from buildings
- 3m from shed
- 1m from non-flammable ranch type fence – otherwise 3m
- 6m from oil tank
- 1.5m from boundary wall

Semi-Mounded Underground Tank - Distance measured from Hood of Tank

- 3m from buildings
- 3m from shed
- 1m from non-flammable ranch type fence – otherwise 3m
- 6m from oil tank
- 1.5m from boundary wall

Overground Tank
